

St. Petersburg, FL

SIGNATURE SERIES EMPIRE TRANSIT SHELTERS

YOUR COMMUNITY. YOUR STYLE. YOUR SIGNATURE.

LOCATION

With over 265,000 residents, St. Petersburg, Florida is the fifth-most populous city in Florida. "The Sunshine City" is situated in the greater Tampa Bay Area sitting on the Pinellas peninsula near the Gulf of Mexico and is a popular tourist destination drawing over 6.5 million overnight visitors each year.

PROJECT SCOPE

With so much tourism, it makes sense that the popular and historical tourist destination, St. Pete's Pier, created a Tram system to help combat traffic for its 10,000+ daily visitors. Stretching 26-acres the Pier District offers walking and bicycle paths, shopping, dining, swimming, concerts, and more.

Tolar designed and fabricated a 32-ft high capacity tram shelter installed at the pier entrance.

The shelter features an expansive 32-ft by 6-ft flat

angled, fully welded Empire roof structure with 1/8" aluminum roof panels secured by gasketed pressure ribs and supported by angled rear posts. The sturdy all-aluminum shelter construction provides electrical access running inside the rear post with electrical components enclosed within the rear beam to power overhead LED security lighting.

Framed aluminum perforated rear wall panels showcase custom printed "St. Pete Pier" wording while the bright yellow tram logo decal applied to 3/8-in clear tempered glass end walls helps tourists easily identify the tram stop along their journey.

Lastly, ample bench seating provides a comfortable place to await the tram.

Enjoy this video from the perspective of a tram rider and watch for the Tolar-built St. Pete's Pier Tram Shelters - www.tinyurl.com/TolarTramShelter.

SIGNATURE SERIES TRANSIT SHELTERS

ON THE STREETS ACROSS AMERICA

(size and design examples)

SIGNATURE VOYAGER MAX LAKE GEORGE, NY
Beautifully designed to embrace the picturesque tourist town of Lake George.

A 62-ft custom axel open canopy shelter with 8-mm bronze twin-wall polycarbonate roof panels with solar illumination. Mesa platform benches with seat delineators, custom passenger information kiosk, and durable baked premium powder coat finish complete the shelter.

CUSTOM SIGNATURE EL SEGUNDO, CA
Modern with a strong statement, this shelter reflects the character of this busy office park and shopping center.

This 8-ft custom flat roof shelter features all steel construction, IPE wood slat decorative ceiling, and 1/4" aluminum roof panels offset with brushed stainless steel. Finished in super durable baked powder coat finish.

SIGNATURE BRAZOS AUSTIN, TX
Part of Capital Metro's Coordinated Bus Stop Street Furniture Program delivering functional street furniture of exceptional design quality.

A custom Signature 12-ft shelter with radius roof, rolled posts rear wind screen, and branding banner.

SIGNATURE CRESCENT TAMPA, FL
A "Kit of Parts" approach.

These 13-ft bus shelters were created in keeping with Tolar's "Kit of Parts" approach. Available with optional end walls, agency branding, dusk-to-dawn solar powered LED illumination and a SmartLink controller allowing for remote monitoring of the solar performance. Amenities include a Mesa bench with a center armrest and 32-gallon trash receptacle.

SIGNATURE SUNSET SAN DIEGO, CA
Three decades designing and fabricating bus shelters, street furniture, and digital solutions.

17-ft advertising shelters with agency branding make a big impact on the streets of San Diego. Passengers enjoy an integrated passenger information display case, Mesa benches, pole mounted trash/recycle bin, and dusk-to-dawn solar illumination in the roof and display case.

SIGNATURE VOYAGER SAN LUIS OBISPO, CA
Maximizing passenger amenities for comfort and convenience.

Four 17-ft spoke-style cantilever shelters offer flexible length adjustments to provide maximum shade. Amenities include steel strap benches, low-draw LED lighting, and back-to-back media display kiosks.

SIGNATURE SUNSET COLUMBIA, SC
Branded shelters in various configurations with minimal unique parts to customize the transit riding experience.

This custom Signature 16-ft shelter is part of a suite of shelters for The COMET. Featuring dusk-to-dawn solar LED illumination, and branded perforated aluminum walls, these shelters were designed with easy installation in mind and a kit of amenities that vary depending on location throughout two counties.

SIGNATURE SUNSET GREENSBORO, NC
State of the art solar powers these city shelters.

This 10-ft shelter is NCDOT PEP approved with its all-aluminum construction and fully welded roof with 3/8-in clear tempered safety glass showcasing highly visible city branding. LED security lighting powered with an RMS50 solar lighting system, including 50W photovoltaic roof mounted panels, provides dusk-to-dawn illumination using UL-listed components. A 7-ft Mesa aluminum frame recycle slat bench provides seating.

These styles are representative of product options within this series. Scan the QR code or visit www.tolarmfg.com for additional ideas, options and specifications.

SIGNATURE PACIFIC ESPANOLA, NM
Curved translucent roof and walls provide visibility beyond the shelter framing the beautiful surrounding landscape.

This brightly-colored 14-ft shelter comes with a flat advertising kiosk, perforated metal walls for airflow, opal polycarbonate curved roof panels, and a beautiful powder coat finish with easy-to-read branding.
